

Facing a Closure or Re-Inspection? **Start Here.**

We don't just fight pests — we help you **pass** inspections and stay audit-ready.

Step 1 – START WITH COMPLIANCE INITIAL

Your Emergency Violation Correction Program

- **Purpose:** Immediate, aggressive corrective action to get you ready for re-inspection fast.
- **Includes:** Deep ULV flushing, multi-phase treatments, drain bio-foam, harborage targeting, and precision monitoring.
- **Goal:** Knock down active pest populations, eliminate risks, and prepare you for the health inspector's visit.

COUNCILMEN
PUBLIC HEALTH COMPLIANCE

Step 2 – ADD TARGETED UPGRADES FOR MAXIMUM SUCCESS

Choose based on your facility's risk zones:

- **SterileZone™** – ULV cold-fogging to reach hidden spaces with micro-droplet coverage. Best for tight, enclosed, and high-risk areas, or simply would like to *accelerate* the process.
- **AtticGuard™** – False-ceiling dusting with DeltaDust® for overhead voids, attic spaces, and ceiling-mounted equipment where pests hide and breed.
- **STIKIS™ Smart Monitor** – 24/7 covert pest interception system for appliances, counters, and baseboard areas to catch activity before it spreads.

Step 3 – TRANSITION TO COMPLIANCE 360

Your Long-Term Protection Plan

Once you've passed, don't go back to square one.

- Ongoing preventative treatments
- Regular compliance audits
- Proactive pest and sanitation monitoring
- Health department inspection readiness

WHY THIS PROCESS WORKS

- Corrects violations fast
- Targets ALL pest life stages & hiding zones
- Creates a monitored, pest-free environment
- Keeps you audit-ready year-round

STIKIS™ Smart Monitor – Concealed Deployment

This discreet, professional-grade IPM monitoring station engineered to withstand harsh commercial environments. Each unit securely holds an adhesive capture strip inside a tamper-resistant housing, allowing for targeted placement in high-risk zones without disrupting daily operations.

By detecting pest activity at its earliest stages, STIKIS™ provides clear, documented activity trends to guide corrective actions, support compliance audits, and maintain long-term control. The low-profile housing allows deployment in food service, storage, and structural void areas while remaining accessible for inspection and servicing.

STIKIS™ Smart Monitor

Rugged • Precise • Audit-Ready

- **Built for Tough Environments** – Waterproof, dust-resistant, and unaffected by kitchen chemicals or grease for reliable, long-term use.
- **Catch Problems Early** – Detects pest activity at its earliest stages for faster corrective action.
- **Compliance Support** – Provides clear, documented monitoring data to strengthen audit readiness and IPM programs.
